

ALASKA 2008

Alaska Rainbow Adventures

Alaska's leading provider of premier float fishing expeditions.

Along with our four to ten day salmon and trout odysseys on waters such as the Alagnak and Togiak rivers, 2008 has us looking to visit some new waters. One of these is in search of trophy Dolly Varden North of the Arctic Circle - This trip is all about dollies - large ones to be specific - that average seven plus pounds can top fifteen pounds and the current state record 8.9 kg (19.75 lbs.) was taken in 1991 from this drainage.

Next there is the trip for Alaska's Tarpon of the North - the sheefish on the upper Kobuk river in late August. This is a world class fishing trip with two options. The first is a 10 day float from the headwaters at Walker Lake where we can fish for Lake Trout and Char for a full day before beginning our week-long descent down river. Short stretches of white water make for unparalleled excitement in this fisherman's dream! The other option is fishing the mid-section of the river, from it's confluence with the Pah River downstream to the Village of Kobuk. This 7 day float puts us among the best fishing the river has to offer.

If you like Northern Pike, another odyssey that we are excited about has the potential to offer up some of the largest Northern Pike in North America. This one to be scheduled in late June or early July - Call.

Note: These trips are planned to different rivers each focusing on but not limited to these species, for additional information and rates call us at 877-235-2647 or 907-357-0251.

And there is more that is new for 2008! We will be offering ½, full and two day salmon and trout trips on rivers just a bit North of Anchorage for those of you who might be visiting the state but are unable to partake in one of our remote wilderness floats.

About us: Started in 1993 Alaska Rainbow Adventures is owned and operated by Alaska resident Paul Hansen who has been tossing a line, pitching tents, manning the oars, paddle or throttle for himself and the pleasure of others here in Alaska since 1979. Our regular staff of guides reside and earn their living here as well, and bring to the river that unique local knowledge of fishing Alaska you can only get as a resident of the 49th state.
